- 2 – 200 Ton machine capabilities
- Removes operator from danger zone to safe location
- Worldwide Shipping
- Large Range of new equipment fitted with Remoquip system available for delivery worldwide

POSSIBLE USES FOR SYSTEM

The Remoquip System enables a standard machine to be remotely operated for a variety of tasks such as:

- Demolition
- Landmine removal
- Excavation
- Working in areas of smoke, fumes, radiation, etc
- Natural disasters
- Earthquake situations
- Landslides
- Emergency services
- Removal of hazardous goods
- Removal of explosive material
- Chemical spills
- Rock breaking
- Mining
- Construction work
- Enabling disabled persons to operate equipment
- Any situation where it is safer or more convenient to have operator work remotely

DON’T BUY A DEMOLITION ROBOT
TRY REMOQUIP FIRST!

- Health & Safety First
- Eliminate the hazards of 3-Phase Electricity on site
- Eliminate need for generator
- Transforms standard machine to demolition robot on demand
- Huge Cost Saving
- Allows Contractor to maximise usage of equipment
- Eliminate need for investment in dedicated machines
